

## DRAWINGS

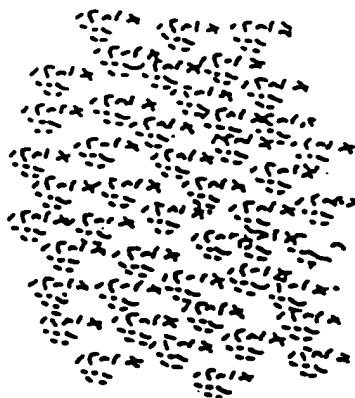

The Patent Office objects to the drawings filed, because they fail to show the deployment of the invention (Figure 1, Stage 1), which states that the invention is deployed from the aft deck of a ship (page 5, lines 6-7), as described in the specification. In response, Applicants have corrected Figure 1, Stage 1 by aligning the ship to show deployment from the aft deck of the ship, such as is shown in Figure 2 and described in the specification as filed. Corrected Stage 1 of Figure 1 shows devices thrown to distances from the aft deck of a ship from the left launcher location, such as is shown in the top view exploded view of aft deck "P" in Figure 2. As a result, and in connection with the prior explanations provided by Applicants, Applicants assert that corrected Figure 1, Stage 1, shows the deployment of the invention from the aft deck of a ship as described at page 5, lines 6-7, and thus, that replacement Figure 1 is in accordance with 37 C.F.R. § 1.83(a) and MPEP § 6.0802(d).
